Why choose R Upskill?

Because one membership gives you all of this. And we encourage you to try before you decide!

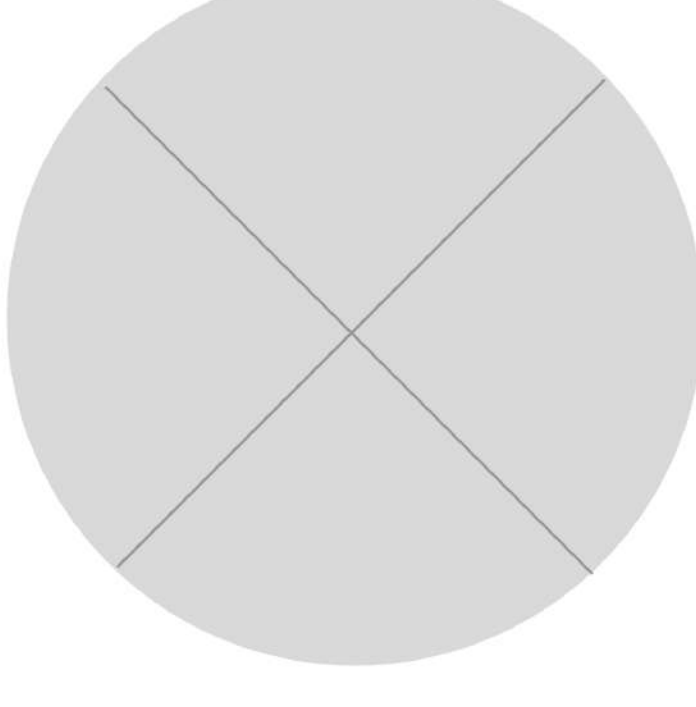

Holistic growth

Being successful in research is a superhuman task. Keep up with courses that focus on both personal and professional skills.

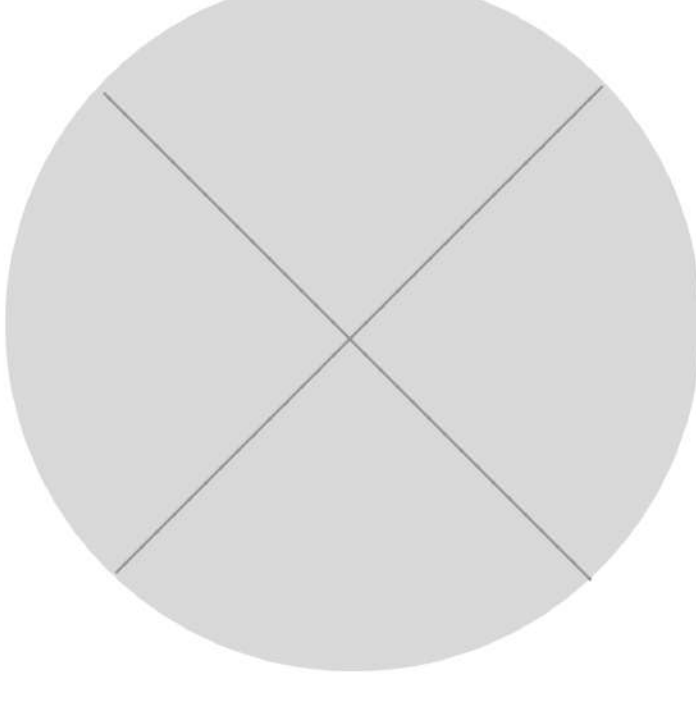

Practical + Easy learning

Learn by doing with tips, templates, cheat sheets, case studies, assignments and interactions with publication coaches.

Bite-sized modules

Time is scarce if you are in research. But you can still learn something every day with micro-courses that are available anytime, anywhere.

Learn from the best

Strengthen the impact of your research. Choose to learn from their collective experience.

R Upskill is the choice of 6,000+ researchers

Here's what some of them have to say

Well organized, affordable courses for scientists

Despite tremendous amounts of online courses on the Internet, those focusing on academic careers for scientists are not many. The R Upskill well-organized (and affordable) courses are great for people who want to boost their abilities for engaging public benefits via science.

Kengo Morohashi
Visiting Associate Professor, Michigan State University, Tokyo University of Science

I thought I knew how to write until I subscribed

The classes were so helpful, and it was only then I understood why I didn't pass in the first place. I appreciated that I could back and look at the recordings in case I didn't understand something.

Zubeta Moledi
Optometrist and PhD Candidate, South Africa
